Data
Queries/
Analytics

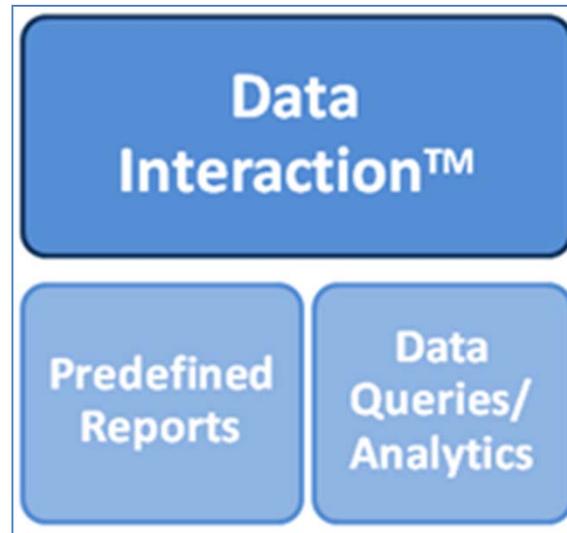

iAuthor – item authoring interface for district, school, and teacher level users

Form Builder – assists users in managing and creating one or more forms for each assessment

Administration (Admin) – view the current status of a particular administration, add and edit users, add students, schedule test sessions, assign test forms, and print student logins

Client – test delivery system

Pre-Defined Reports – individual student reports

Data Queries/Analytics – ad-hoc roster reports, summary reports and statistical analysis tools

The purpose of this training is to expose you to the teacher level roles so that you are equipped to train the teachers on how to utilize the formative assessment capabilities of the SDAP.

The South Dakota Assessment Portal will be accessible at

<https://sdap.emetric.net>

The usernames and passwords will be distributed via email. Upon your first login, the system will require that you reset your password for security purposes.
